

# SE GROUP Team Member

## Mark D. Kane

### Principal

Mark brings over 18 years of experience in environmental and land use planning and analysis to the SE GROUP team. Mark often focuses on the permitting and entitlement issues of projects, in addition to providing consulting and expert testimony related to aesthetic and land use alteration and developing strategies and techniques for promoting environmental sustainability on land development projects. Mark is a consummate strategist: as the principal overseeing all aspects of the company's land planning and design projects, he always has an eye on the bigger picture issues. His experience and global perspective has earned Mark a seat on the External Advisory Board of the Graham Environmental Sustainability Institute, a private think tank within the University of Michigan that is focused on the issue of sustainability. Mark's areas of expertise include Regional and Land Use Planning, Aesthetics and Environmental Impact Analysis, Permitting and Entitlement, and Geographic Information Systems.
